Proctor Sales has been a manufacturers' representative serving the mechanical community in the Pacific Northwest since 1957. We've grown into one of the largest hydronics representatives in the nation, representing nine boiler manufacturers and multiple burner manufacturers. We are in a unique position to offer a broad spectrum of combustion products to the local mechanical community.

We would like to offer a one hour presentation covering our capabilities in boiler and burner technology.

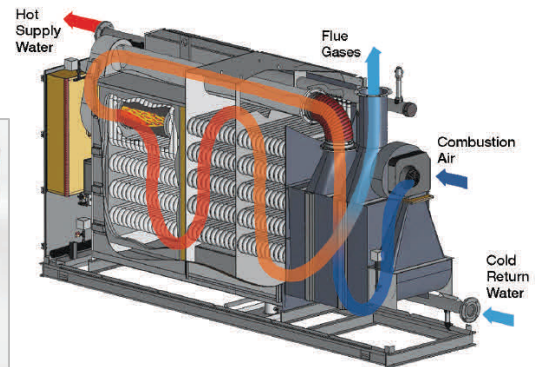

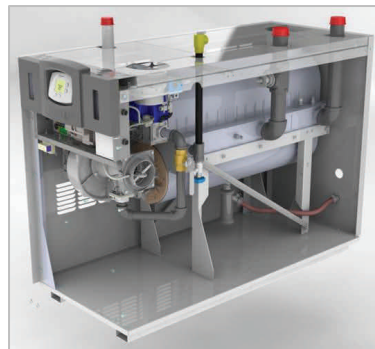

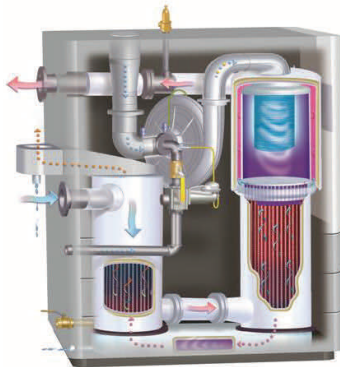

We represent both conventional and condensing manufacturers used in both process and HVAC applications. We offer controls and burners designed to make the most efficient conventional boiler combustion system.

We will also cover the latest designs in condensing boiler technology and demonstrate how to maximize utility of condensing technology.

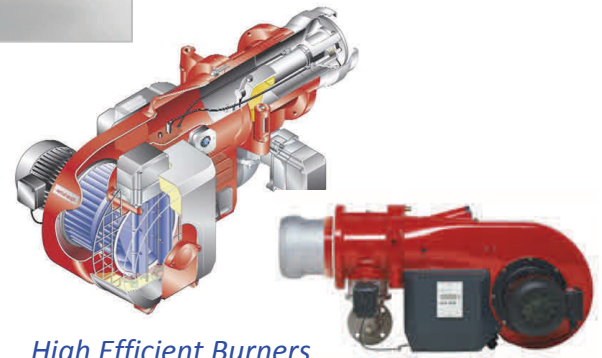

Condensing Boilers and Water Heaters by:

- Aerco
- Armstrong
- Bryan Boilers
- Laars
- Weil-McLain

Solution Partner
Combustion Controls

High Efficient Burners
